

Severian Roth

WordPress & frontend development

SeverianRoth@proton.me

github.com/SeverianRoth/service-site-examples

Responsive service websites, custom WordPress child themes and practical enquiry flows. I turn a page brief into an editable build with source, focused browser checks and clear handoff notes.

DELIVERY FOCUS

- HTML, CSS, JavaScript and WordPress theme implementation.
- Service navigation, portfolio filtering and structured enquiry interfaces.
- Responsive layout, keyboard interaction, form behavior and contrast review.
- Git-based source delivery, WordPress Playground previews and editor handoff.

SELECTED WORK

STEEL-ONE Construction homepage concept · 2026

Designed and implemented a responsive construction homepage with a project selector and enquiry preview. Delivered a Twenty Twenty-Five child theme and an editable WordPress Playground version.

severianroth.github.io/service-site-examples/steelone/

Northstar Client Services Original portfolio demo · 2026

Built a service intake experience with routing and booking-state previews, a responsive frontend and a WordPress child theme. Included the source and a browser-based WordPress instance for inspection.

Triple Double Real-estate homepage concept · 2026

Created an original institutional homepage direction, portfolio filters, responsive desktop/tablet/mobile views and layered PSD deliverables with a design system and frontend source.

severianroth.github.io/service-site-examples/triple-double/design.html

BUILD VERIFICATION

Six WordPress examples checked in WordPress 7.1 / PHP 8.3 at desktop, tablet and mobile sizes. The source repository includes the child themes and reproducible Playground blueprints. Project-specific checks cover the interaction each page demonstrates.

ENGAGEMENT

Fixed-scope website implementation and improvements, from a supplied design or an agreed page direction. A first homepage and form assignment can include responsive review, source delivery and an editor handoff.
